Overview

Students of all skill levels and experience have the opportunity to develop their skiing and riding technique through small group instruction. There is an emphasis on versatility and efficiency in varied terrain and snow conditions. Instructors will apply teaching methods set out by the American Association of Snowboard Instructors and the Professional Ski Instructors of America.

Objective

1. To introduce students, who have never skied or snowboarded, to the sport and to enhance the experience of those who already participate.
2. To increase the enjoyment derived from participation in these activities by developing a repertoire of skills that students can draw on to handle various terrain and snow conditions and maintain control at all times.
3. To develop an understanding of the fundamental movements used in skiing and snowboarding.
4. To ensure safety of all participants during classes and when they are participating in the sport in the future.
5. To develop an understanding of the mountain environment in winter and how to dress appropriately for the conditions and the demands of the sport.
6. To develop knowledge of the current trends in snowsports equipment and how it affects technique.
