Kinesiology and Health Science Department Undergraduate Students win the 2021 Student Research Symposium Social Sciences and Education Oral Presentation Award!

Recent undergraduate student, Christopher Long, and senior undergraduate student, Samantha Corbridge, were awarded the 2021 Student Research Symposium Social Sciences and Education Oral Presentation Award. Their presentation entitled, ‘The effect of step edge highlighters and distractions, such as mobile devices, on successful stair negotiation’ evaluated the impact of stair striping and the use of mobile devices on fall frequency during stair negotiation. More information on their research presentation can be found here. This work was made possible through an Undergraduate Research & Creative Opportunity (URCO) Award (Fall 2020), mentored by Assistant Professor Dr. Christopher J. Dakin (chris.dakin@usu.edu) and Postdoctoral Fellow Dr. Sara A. Harper (sara.harper@usu.edu). For information about future research, research volunteer or participation, please contact the Neuromechanics Laboratory.
