Your program of study is under the direction and approval of your supervisory committee. Your Program of Study (PoS) is the official agreement between you, the USU School of Graduate Studies, and the KHS department that the courses listed therein fulfill the requirements for the specified degree. Our department does not use degree works as a tool to measure the completion of requirements for our graduate programs. We check for the completion of your required courses through your program of study form and your transcript. Upon matriculation to the program the KHS GPC, Department Head, and the program director will help guide you through the coursework until you have selected and formed your committee. The culminating experience will be under the supervision of supervisory committee.

**Notes:**

- The Program of Study for a Master's degree must include at least 15 semester credits at the level of 6000 or above. Coursework that is below the 5000 level should typically be in areas outside the student's graduate degree field, and must be approved by the student's supervisory committee as appropriate for the student's individual degree program.
- Courses that students entering the graduate program are expected to have taken as undergraduates and prerequisites for graduate courses may not be included on a Program of Study.
- No more than 12 semester credits taken at USU or another institution prior to matriculation at USU may be used in a program of study for a graduate program at USU. Credits with P grades may be transferred only with committee approval.
- Credits in the following areas are not acceptable in a graduate degree program: foreign languages, continuing graduate advisement, individual home study, military science, and courses numbered below 3000.
- Coursework that is more than eight years old may not be used for a graduate degree unless it is revalidated.
- To register for an Independent study or research course students must work with a KHS faculty mentor. Students are expected to complete an independents study or research contract with their mentor. A copy of this contract must be submitted to the KHS main office.
- If a faculty member takes sabbatical, the graduate courses that that faculty member teaches will not be taught.

Course Offerings			Cr.	Fa	Spr	Sum

For the first two years of the program, courses are offered on a two-year rotation so it is recommended that students work with the program director to know what the recommended schedule is for students to finish the program in two years. There is some flexibility with a few of the courses but otherwise students should plan to take the courses as listed.
